THE OFFICIAL PUBLICATION OF THE UNIVERSITY AVIATION ASSOCIATION

JUNE 2023

UAA Awards CAE Entry Level Jet Scholarships Worth \$136,000

Jasmine Lombardi
ERAU

Nicolas Piliero
Rocky Mountain College

Stephan Westrum
LeTourneau University

Allison Yager
WIA Dubuque Chapter

University Aviation Association and CAE announced four deserving aviation scholars as recipients of the 2023 UAA/CAE Entry Level Jet Scholarship.

Scholarship winners Jasmine Lombardi, Nicholas Piliero, Stephan Westrum, and Allison Yager were awarded scholarship valued at \$34,000 each for initial training in an entry-level corporate jet, resulting in a type rating upon successful completion of the course.

Jasmine Lombardi is a recent graduate of Embry-Riddle Aeronautical University with a degree in Aeronautical Science. She is originally from New Jersey which is where her aviation journey first began in 2017. She is extremely excited to see what this opportunity has in store for her and her future.

Nicolas Piliero is from Colorado, he is a flight instructor at Rocky Mountain College. The past few years he has enjoyed the multitude of challenges and opportunities that the aviation industry has provided. He is thrilled to have

the chance to obtain advanced flight training through the CAE Entry Level Jet Scholarship.

Stephan Westrum is a flight instructor at LeTourneau University and recently graduated with a degree in Mission Aviation – Flight concentration. Stephan seeks to gain corporate aviation experience and broaden his horizons so that he could share that experience with his future students.

Allison Yager is a commercial pilot and certified flight instructor with experience in both single and multi-engine aircraft. With a Bachelor of Science degree in Flight Operations and Aviation Management, she has developed a strong foundation in aviation operations. Additionally, she has been actively involved in promoting women in aviation through her leadership roles in the Women in Aviation Dubuque Chapter and volunteer work at the Dubuque Regional Airport.

Student Research Poster Contest

The student research poster contest is closing June 1. The posters highlight students' research at the college level.

The poster competition both graduate and undergraduate students the opportunity to publish and share their research findings at the conference and via the UAA Web site, www.uaa.aero.

All accepted entries will be posted in a public area of the UAA conference for judging and public viewing by members and the general public. Winners will be announced at the 2023 UAA Collegiate Aviation Education Conference, and cash awards will be given in both the undergraduate and graduate categories. First, second, and third place winners in both categories will receive cash prizes of \$500, \$250, and \$100, respectively. All participants will receive certificates of accomplishment.

Abstracts must be less than 250 words and must include the following information with the submission.

UAA is Now Accepting Nominations for the 2023 Awards of Excellence

Nominations are open for: Champion of Aviation Award, Frank E. Sorenson Award, John K. Lauber Safety Award, V.L. Laursen Award, William A. Wheatley Award, and W.W. Estridge Award.

Details regarding the awards, including submission guidelines and nomination form, can be found on the UAA website at www.UAA.aero under the Resources>Awards link.

All awards will be presented at the UAA Annual Awards of Excellence Dinner to be held September 28, 2023 in St. Petersburg, FL. Please note that all nominees except for the Lauber Safety Award must be actively involved UAA members in good standing.

Deadline for 2023 award nomination submissions is **June 16th, 2023.**

UAA Seeking Nominations for 2024 Board of Trustees

This could be your opportunity for a rewarding contribution of service to your association and your profession. The Nominations Committee welcomes recommendations for qualified individuals for the following **3 year terms**.

Educator Trustees - Two Positions

An Educator Trustee shall be a person who is a voting member in good standing in the Institution, Academic or Emeritus membership categories and a faculty member or administrator at a college or university, which is an Institutional Member of UAA.

Industry Trustee - One Position

An Industry Trustee shall be a person who is an individual voting member in good standing and a full-time employee of a company, government agency, or officer of a non-profit organization, which is an Industry member of UAA.

Member At Large - One Position

The Trustee representing the membership and the industry at large shall be a person who is an individual voting member in good standing in any membership category. A Trustee at Large is NOT be required to be from a college or university which is an Institutional Member of the UAA.

Secretary (2-year term)

The Secretary shall keep the minutes of all meetings of the Board and shall assure that all notices are given in accordance with these Bylaws or as required bylaw. The Secretary shall implement and conduct all aspects of the actual election process. With the results to be announced at the annual meeting of the membership.

Treasurer (2-year term)

The Treasurer shall be responsible for the control of all monies collected and disbursed by the UAA and shall provide a report of the UAA's financial condition at the quarterly meetings. The Treasurer will be responsible for the overall financial condition of the Association and will prepare, with input from the other four Officers and the Executive Director, the annual budget for approval by the Board.

Each position is elected by ballot of the membership. Election results will be announced at the UAA Collegiate Aviation Education Conference & Expo September 27-29, 2023, and will join the Board of Trustees January 1, 2024.

For a Board of Directors Nomination form email UAA at hello@uaa.aero. **The deadline to nominate is July 1st.** Elections open August 24th and run through September 7th.

St. Petersburg Donations Needed

The University Aviation Association (UAA) will hold a Silent Auction during its 76th Collegiate Aviation Conference & Expo in St. Petersburg, Florida. Proceeds from the Silent Auction will benefit the UAA Endowment Fund for scholarships and educational programs.

If you or your organization would like to donate one or more items to the Silent Auction, e-mail this completed [form](#) to be received by September 18th.

Shipped items must be received in St. Petersburg by September 25, 2023 OR hand-deliver to registration counter at UAA's 2023 Collegiate Aviation Education Conference & Expo.

Donate today. Although not required, aviation-themed items normally spark the most of enthusiasm among bidders.

For questions or help with registration contact (901) 563-0505 or address your questions to hello@uaa.aero.

All silent auction donations fund UAA scholarships.

SIU Flying Salukis Continue National Success with 3rd Place

Tradition and consistency are pivotal to success. Both are trademarks of SIU Carbondale's Flying Salukis when it comes to collegiate aviation.

With 12 of 18 team members scoring points, Coach Nathan J. Lincoln, a senior lecturer in aviation management and flight in the School of Aviation, was pleased with the team's performance, which included finishing second overall in flight events. The May 8-13 competition featured 28 teams. ERAU-Prescott won the title, followed by the University of North Dakota.

Results are available on the NIFA website.

Purdue Startup Aerovy Mobility Develops Software to Support Infrastructure for Electric Aircraft

The advanced air mobility sector, which includes electric-powered urban and regional aircraft, may become a \$1.5 trillion market by 2040. A new Purdue University-connected startup could benefit airport and vertiport operators and real estate developers looking to establish advanced air mobility technology at existing and potential sites.

Purdue University postgraduate students have launched Aerovy Mobility, a startup company that commercializes cloud-based software solutions to plan and operate infrastructure that charges electric aircraft with renewable energy.

Nick Gunady is Aerovy Mobility's CEO, a PhD candidate in Purdue's School of Aeronautics and Astronautics and research assistant in Purdue's Center for Integrated Systems in Aerospace. He said improvements in battery energy technologies have improved enough to make electric propulsion technically feasible and economically viable.

The Memphis Student Aviation Association (MSAA) Forms

The successful first meeting of the Memphis Student Aviation Association, which was held at the Millington Airport.

The event was a great success, and we were delighted to have a distinguished group of speakers, including Captain Coryat from the University of Memphis and CTI's Director Paul O'Neil.

The meeting provided an excellent opportunity for students interested in aviation to come together and learn about the various opportunities available to them. UAA, also gave a presentation on the various aviation scholarships and seminars available to students.

UAA 2023 Collegiate Aviation Education Conference & Expo

Hilton St. Petersburg Bayfront | September 27-29

Conference Scholarship for Faculty

Two scholarships will be awarded, \$1,500 plus Conference registration

UAA is pleased to invite applications for the UAA Scholarship for Faculty for the 2023 Collegiate Aviation Education Conference, in St. Petersburg, FL. The scholarships aim to provide promising new faculty from selected institutions, who would not otherwise be funded for conference, financial support to attend.

The scholarships are designed to provide faculty enrichment for developing institution programs that are committed to aviation faculty development. Applicants must be full-time aviation program staff or faculty at a college or university and provide a letter of support for their request.

Now Open! DEADLINE TO APPLY IS JULY 3, 2023. **APPLY HERE**

TWU Approves Aviation School with \$15m Gift

The Texas Woman's University Board of Regents voted unanimously Wednesday morning to approve a new School of Aviation Sciences and degree program. They also celebrated the largest gift in the university's history – \$15 million from the Doswell Foundation.

The gift comes after the CEO of the Doswell Foundation, Beverly Fricke, approached TWU Chancellor Carine Feyten with the idea to launch a flight school at the university. Fricke wanted to honor her late husband, Kenneth Fricke, who had taken flight training. Kenneth Fricke was the nephew of Florence Doswell. He died in 2021.

"After all, we are tied for No. 1 in Texas for diversity and No. 4 in the country, and TWU has a long history in the world of aviation," Feyten said, referencing the university's collection of the official archive of the **Women Airforce Service Pilots** and contributions to the **Whirly-Girls**, an organization advancing women in helicopter aviation.

"Texas Woman's University and the Doswell Foundation recognize that women have been historically underrepresented in aviation and our shared commitment has led to the creation of the Doswell School of Aeronautical Sciences," board Chairwoman Stacie McDavid said.

A goal of the program is to attract more women into the industry as pilots by reducing barriers like cost. The university plans to buy simulators as another way to lower costs for students. FAA-approved coursework will allow the graduates to apply for a Restricted Airline Transport Pilot Certification after graduation. This will lower the required number of flight hours from 1,500 to 1,000. Graduates will be able to become commercial pilots with less time and at a lower cost.

FAA Easing Mental Health Barriers for Pilots

Federal Air Surgeon Dr. Susan Northrup aims to get pilots who are grounded because of mental health issues back in the air.

She addressed concerns about pilot mental health and discussed upcoming revisions to certification procedures and rules from the FAA that will make it easier for pilots to regain their medical certificates and decrease wait times for pilots grounded for mental health issues.

Northrup, a private pilot and retired U.S. Air Force colonel, has been focused on addressing mental health issues within the FAA since her 2021 appointment as the most senior medical certification official. In 2022, Northrup participated in an AOPA roundtable discussion on pilot mental health at EAA AirVenture Oshkosh, where she said, "Mental health conditions remain high on my list of things we need to address within the FAA," emphasizing her focus on early intervention and the importance of changing the aviation culture around mental health issues.

JOSEPH FRASCA EXCELLENCE IN AVIATION SCHOLARSHIP

Two \$1,000 Scholarships for Aviation Studies

The Joseph Frasca Excellence in Aviation Scholarship was established through the UAA to encourage others to reach the highest level of achievement in their aviation studies. It is bestowed upon those who demonstrate a commitment and devotion to aviation in the tradition of Joseph Frasca.

NOW OPEN! DEADLINE TO APPLY IS JUNE 30, 2023

APPLY NOW!

FedEx Pilots Authorized Union Leaders to Call a Strike

FedEx pilots on Wednesday, May 17, voted to strike if necessary to achieve a new labor agreement with FedEx.

With more 97% of the Air Line Pilots Association members participating, 99% of FedEx pilots authorized union leaders to call a strike if needed.

The pilots' contract became amendable in November 2021, with negotiations beginning in May 2021.

"Today, FedEx pilots spoke with one unified voice and sent a clear message to management that we are willing to go the distance to secure a new contract," said Chris Norman, chair of the FedEx ALPA Master Executive Council.

"Now is the time for FedEx to deliver a new contract that reflects the value we bring to FedEx as highly skilled professionals who deliver FedEx's Purple Promise every day. Our goal is to reach an agreement, not to strike," Norman said. "The ball is in management's court, and it's time for the Company to get serious at the bargaining table and invest in our pilots."

A representative of FedEx said the decision should not affect the company's operations at this time.

"FedEx remains focused on providing world-class service to our customers," the company said in a statement Wednesday.

"While strike authorization votes are a common tactic for labor organizations during Railway Labor Act negotiations, strikes are only possible with the express permission of the National Mediation Board," FedEx said in the statement.

"They can only occur after the parties have passed through multiple legally mandated steps, and only when other safeguards, such as Presidential or Congressional intervention, do not occur.

At this time, we are still in productive negotiations with our pilots under the supervision of a government-appointed mediator and will return to the bargaining table next week."

The FedEx pilots are working under contractual provisions and benefits negotiated in 2015.

Negotiations for a new agreement began in May 2021, six months prior to the amendable date of November 2021. Talks entered mediation in October 2022.

Before a strike can take place, the National Mediation Board must first decide that additional mediation efforts would not be productive and offer the parties an opportunity to arbitrate the contract dispute.

If either side declines the arbitration, both parties enter a 30-day "cooling off" period, after which the parties can engage in self-help, or a strike by the union or a lockout by management.

Martha and John King Enter WAI Pioneer Hall of Fame

In February, the Kings were inducted together into Women in Aviation International's Pioneer Hall of Fame and were in the company of more than 100 trailblazing women -- the likes of Amelia Earhart, Anne Morrow Lindbergh and astronaut Sally Ride - who have made their marks in the history of aviation.

Notably, the Kings have campaigned for an active approach to aviation safety, rejecting the belief, encouraged by airplane manufacturers, that private flying is an inherently safe activity. Conscious risk management and ongoing education are, in their view, the real cornerstones of aviation safety.

Delta TechOps Donates Pratt & Whitney Engine to Vaughn College

Vaughn College, a partner school for Delta TechOps, received an engine donation in March to assist students studying to become aviation maintenance technicians (AMTs) with their training. Through Delta TechOps' TechU AMT career pathway program, Delta's partnership with Vaughn College plays a vital role in meeting the demand for certified AMTs in the metropolitan region as well as across the nation.

The donated engine is a JT8D, an engine that is considered highly durable and reliable having completed more than 673 million dependable flying hours since entering service. Today, there are 2,400 engines in use around the world.

MTSU, Southwest Airlines Partner in Pilot Recruiting Program

Middle Tennessee State University's highly touted Department of Aerospace joined the Southwest Airlines "Destination 225°" program, as one of the newest partners in the airline's unique "First Officer" development and recruitment program.

Destination 225° builds pathways for aspiring pilots from university aviation programs across the country to first officer roles at Southwest Airlines.

On a compass rose, 225° is the southwest heading. The Destination 225° program provides several pathways designed to meet future aviators where they are at their current experience level and create opportunities to take them to the right seat in a Southwest aircraft.

With 900 professional flight majors, MTSU aerospace students will have access to a pathway that leads to becoming competitively qualified for a commercial pilot career at Southwest. The Destination 225° program includes pilot pathways for those just starting to fly, those working on university degrees and those already building time toward their airline transport pilot certifications.

In the aviation industry, a first officer is a commercial airline pilot who works in the cockpit with the captain to assist them with flight navigation and operation. Also known as a co-pilot, they sit in the right hand seat and are the second in command.

MTSU Aerospace Chair Chaminda Prelis said the partnership "is an excellent opportunity and the latest in many unique endeavors supporting our students' career goals. Programs like Destination 225° are a fantastic way for our students to embark on fulfilling their career aspirations after graduation. We look forward to a long and prosperous partnership with Southwest Airlines."

Airport Design Challenge

The Airport Design Challenge (ADC) is an interactive learning and collaboration opportunity for students in grades K-12. The FAA Science, Technology, Engineering, and Math Aviation and Space Education (STEM AVSED) Program organizes and sponsors this exciting challenge.

During the Airport Design Challenge, students have the opportunity to design virtual airports in Minecraft based on guidance from FAA aerospace and engineering experts. Participating students meet aviation professionals, engage with other designers, and learn about the aerospace industry. The challenge offers first-hand experience in an aviation-related application of STEM concepts and helps students apply their academic knowledge and skills to professional simulations.

While participants are encouraged to form teams of up to five members, they may also participate individually. Instructional modules cover topics ranging from airport layout, to pavement and lighting, then on to structures, and finally, innovative growth. Module knowledge check assignments and screenshots of students' designs are used to assess progress and provide feedback.

Review last year's finalists in our [Fall 2022 Airport Design Challenge Finalists YouTube playlist](#).

UAA in Vegas at PAPA Conference

Thank you to EVERYONE that came by our booth at PAPA in Vegas. Professional Asian Pilots Association has grown tremendously in the past year - as has their support base of airlines. UAA Board Trustee William Kwong (L) from Boeing, and UAA President Chaminda Prelis (R) of Middle Tennessee State University, were gracious enough to manage our UAA booth and represent collegiate aviation at the conference.

Pilot Mental Health, Drone Swarms Top ERAU Student Showcase

More than 100 students from Embry-Riddle Aeronautical University gathered recently to present research to the campus community and compete for grant funding. Their topics of focus varied greatly, with the top two winning projects each focusing on very different areas of aviation.

Worldwide Campus senior Lauren Pitts, for instance, who won the top prize in one of two undergraduate student sessions, explored how "healthcare aversion" and nondisclosure surrounding **mental health diagnoses affect the student pilot population.**

"Pilots' reluctance to seek care for health issues has been attributed to fear of losing medical certification and, subsequently, flight privileges," said Pitts, an Aeronautics major. "A better understanding of these topics would benefit the industry in that additional support systems could be implemented to help pilots access the care that they need."

Daytona Beach Campus student Jack Capuano, whose project explored the development and verification of a new **search-and-rescue model for drone swarms**, won first place in the event's other undergraduate session.

The event also featured graduate research. First-year Engineering Physics Ph.D. student Jared Nelson, also from the Daytona Beach Campus, led the pack in this category with his project that explores how metals interact with "high-voltage" electrical equipment, such as satellites.

Embry-Riddle's annual Discovery Day Research Symposium, hosted by the Office of Undergraduate Research, offers students the opportunity to showcase their work and network with fellow researchers.

"The vision for this event is to increase the visibility of the students' research achievement and increase opportunities for collaboration," said Ronnie Mack, director of the Office of Undergraduate Research.

NBAA Reaches Out to College Students About Aviation Careers

At a time when the aviation industry is facing a shortage of pilots and other employees, NBAA is making a concerted effort to recruit students into a business aviation career path.

"It's important for NBAA to be at these types of events because it ensures that business aviation is present in the conversation when students are thinking about their futures. For most people, if they are going to interact with aviation it is going to be with the airline industry, so when students start thinking about potential career paths, that is likely the piece of the aviation industry most

familiar to them," said NBAA Professional Development Specialist Elayna Hall, who recently attended a career fair at the University of North Dakota.

There is increasing demand not only for pilots, but also maintenance technicians, operations managers, dispatchers, line service technicians and flight attendants. NBAA touches on all these careers – and more – at career fairs and other events.

NBAA Manager, Operations Noah Yarborough recently took part in the Alpha Eta Rho (collegiate professional aviation fraternity) National Conference In Dallas, TX and spoke with more than 100 students from around the country.

NBAA Local and Regional Groups Committee Vice Chair Jessica Belcher, marketing manager at Exclusive Aircraft Sales, recently helped organize a Corporate Aviation Day at North Star Aviation at Mankato Regional Airport in Minnesota. More than 125 students registered for the event and more than 20 companies took part.

"These students did not know that business aviation had competitive salaries to the airlines and had flexible schedules. They didn't know about all of the different opportunities and different types of career paths," he said. "I went into detail on the differences between Parts 125, 91 and 135 operators, why they should choose business aviation as a career, scholarships, networking events, the industry's amazing community and more.

NBAA Local and Regional Groups Committee Vice Chair Jessica Belcher, marketing manager at Exclusive Aircraft Sales, recently helped organize a Corporate Aviation Day at North Star Aviation at Mankato Regional Airport in Minnesota. More than 125 students registered for the event and more than 20 companies took part.

"With the airlines having such a major presence at these events and on the campus in general, it's important to emphasize the benefits of working in business aviation versus other avenues and the wide array of career paths available within the industry," said Hall.

TRAIN FOR AN AVIATION CAREER ACCELERATED PATHWAY

California Aeronautical University is preparing the next generation of aviation professionals. With locations in California and Arizona, CAU courses are delivered in a fast-paced schedule that enables students to enter the pipeline for aviation careers more quickly. Financial aid and scholarships to those who qualify.

*Add student
capacity without
using your capital*

You are an expert at flight training. But growing student capacity is difficult considering rising prices of aircraft.

You likely have tremendous equity in your fleet. Our program allows you to access that equity, easily and quickly, to support your school's growth.

Stay focused on what you do best —training students. Use our capital to fund your growth!

FAA Updates Its Blueprint for Air Taxis, Urban Air Mobility

It's been nearly three years, so a recalibration was inevitable. And this undoubtedly will not be the final update.

The future of flight has gotten some revised guidelines, as last week the FAA updated its blueprint for advanced air mobility services in urban areas. A swarm of eVTOL aircraft and air taxis are set to reach the sky in the coming years, ferrying small groups of passengers and cargo from airports and across cities.

In many cases, planners expect for areas not previously served by aviation to become reachable by air travel.

Developed by the FAA along with NASA and aviation industry stakeholders, the urban air mobility blueprint focuses on

flights in and around urban areas. The broader concept of advanced air mobility fits a broader framework of airspace and destinations.

As operations get underway, the FAA plans for air taxis and similar aircraft to operate in lower numbers before scaling. The usage will be primarily in a similar fashion to present-day helicopters, relying on existing routes, as well as helipads and some early vertiports now in planning stages.

"Pilots will communicate with air traffic controllers where required," an introduction to the second draft of the blueprint states.

"As the number of operations increases, air taxis are expected to fly in corridors between major airports and vertiports in city centers," it continues. "The complexity of the corridors could increase over time from single one-way paths to routes serving multiple flows of aircraft flying in both directions. Over time, these corridors could link an increasing number of routes between vertiports."

View the FAA airspace blueprint for air taxis video [here](#).

JSfirm.com Partners with ASA

JSfirm.com is proud to announce Aviation Supplies and Academics, Inc. (ASA) as our newest Job Distribution Partner. This partnership allows job seekers to find the latest aviation opportunities directly on ASA's website.

Abbey Hutter, Executive Director for JSfirm.com, said "Brian and I connected previously but they were in the middle of a website overhaul. I was excited when he reached out recently and said they were ready!" She continued, "Our partnerships benefit all parties, companies get more visibility on their jobs, ASA provides a new added value/resource and their website traffic sees opportunities they may not have been aware of otherwise."

Brian Snider, Marketing Director for Aviation Supplies & Academics, Inc., said "ASA is excited to partner with JSfirm.com in providing this great resource to our customers with interest in aviation careers. In turn, we hope job seekers find ASA to be a useful resource for advanced and continuing education."

EARLY BIRD ENDS MAY 31ST

UAA 2023 Collegiate Aviation Education Conference & Expo

Hilton St. Petersburg Bayfront | September 27-29

HILTON ST. PETERSBURG BAYFRONT

333 1st Street SE Saint Petersburg, Florida, 33701
(727) 894-5000

University Aviation Association invites you to the 2023 Collegiate Aviation Education Conference & Expo in St. Petersburg, Florida. Our Conference will be held in the Hilton St. Petersburg Bayfront from September 27 - 29, 2023. This 3-day event offers innovation workshops, thought provoking education sessions, and opportunities for attendees to hear from leaders across the industry. During the meeting, committees meet to discuss targeted issues and policy positions that affect core groups within the membership.

ABOUT ST. PETERSBURG

St. Petersburg, which glimmers between the Gulf of Mexico and Tampa Bay, is known for its warm weather and for holding the title of "most consecutive days with sunshine" at 768 days! Whether you're having some down time on America's best beaches or admiring beautiful Tampa Bay from downtown St. Pete, you're in for some major fun in the sun.

WHAT TO DO AROUND HERE

Downtown St. Petersburg is the city's heart, home to great shopping, restaurants, bars, and attractions. After making a stop to check out the largest collection of Dali's work outside of Spain, swing by the Chihuly Collection on Central Avenue to witness mind-blowing glass work.

ROOM RESERVATIONS

Group Name: UAA Conference and Expo
Booking Method: Individual Call In / Link
URL Link: <https://group.hilton.com/1r4u8z>

GUEST ROOMS

Great views of Tampa Bay and the city. Guest rooms provide voice mail, iron and ironing board, internet access, coffeemaker, hair dryer, data ports, two phones with separate lines and a spacious work desk. Standard rooms have either one king or two double beds. We now feature PURE® Wellness accommodations, which are nearly 99.9% allergen-free...an experience that enhances your well-being so you can sleep better and be at your best.

**NetJets
First Officers**

NetJets is actively seeking First Officers who have a positive attitude and genuine passion for what they do. NetJets operates the largest, most diverse private aircraft fleet in the world and offers a full range of personalized private aviation solutions to meet—and exceed—the high standards of the world’s most discerning travelers. Our industry-leading scale and aviation business model offer our Owners dependable financial sustainability unlike any other in the industry. We are proud to be a Berkshire Hathaway company, known for our unwavering commitment to safety, service, and unmatched global access.

As a NetJets Pilot, you can expect to experience:

- An Unparalleled safety culture: NetJets has an uncompromising commitment to safety. It’s at the core of every decision made and everything we do, from our proprietary training program to our dual-release dispatch system that gives our pilots the authority to remove aircraft or themselves from service because of safety or health concerns.
- Flexibility to choose where you live: We have over 200 different airports you can choose to be based out of, with the option to change every 7 days (not seniority based). All travel back and forth to the aircraft is on company time and arranged by us.
- Exceptional equipment and support: Fly the newest aircraft with the latest avionics. Every pilot has the expertise to fly any type of aircraft but the focused discipline to fly only one. Pilots are supported by an operations infrastructure unlike any other. They focus on everything from meteorology and flight plans to catering and ground transportation.

Top pay and comprehensive benefits:

- Excellent salary
- Complete medical benefits effective upon date of hire
- 401(k) plan with company matching
- Life and AD&D benefits
- Paid time off
- Company-provided uniforms and generous annual-replacement credits
- Generous meal allowance
- Travel and hotel expenses

Indiana State University

Tenure - Track Assistant Professor in Aviation Technology

The Aviation Technology department at Indiana State University seeks applications for an instructor position beginning August 1, 2023. The minimum requirements for this position is a Master's degree in Aviation, Education, Electronics, Engineering, Engineering Technology, Robotics, or an Unmanned systems-related field and demonstrated experience in UVS in academia. Must have a minimum of 18 graduate hours in aviation or unmanned systems-related courses. The completion of an appropriate doctorate degree will be required within 5 years.

This position will be responsible for Teaching undergraduate courses and assuming a leadership role in the management of the department's Aviation Technology degree programs. Other responsibilities include serving on University committees, curriculum development, academic advisement, and performing appropriate scholarly research and professional service within the guideline of the University.

Submit applications electronically at <https://jobs.indstate.edu/postings/42915>, including a letter of application, vitae/resume, letters of recommendation and your V.S and Master's transcripts.

For full consideration, please submit application and all additional materials by April 25, 2023. The review of applications will continue until the position is filled, but applications submitted after this date cannot be assured of consideration.

Indiana State University has been recognized by Forbes as one of America's Top Colleges and by the Princeton Review as among the best in the Midwest. Located in Terre Haute, Indiana, its pedestrian friendly and beautifully landscaped campus has earned a Tree Campus USA designation and has been recognized by Princeton Review as one of the most environmentally responsible college campuses.

Located in the heart of Terre Haute's downtown, Indiana State's campus is within walking distance to local shops and restaurants. Situated near the Indiana-Illinois border, the campus is about an hour's drive from Indianapolis and within a few hours of other major metropolitan areas including St. Louis, Chicago, Cincinnati and Louisville.

The University is ranked number one among Indiana's public and private institutions on CollegeNet's annual social mobility index. There are more than 250 student-run organizations offering activities and entertainment throughout the year along with 15 NCAA Division I athletic teams, a first-rate student recreation center with numerous classes and recreational sports programs, and a Performing Arts Series and University Speakers Series which bring national touring productions and speakers to campus.

California Aeronautical University

Assistant Director of Flight Instruction

California Aeronautical University is seeking qualified applicants for a full-time Assistant Director of Flight Instruction for the University's San Diego, CA location. The successful candidate is responsible for providing safe, effective and efficient FAA Part 141 flight instruction operations for the University that is in accordance with all local, state, and federal guidelines. The Assistant Director of Flight Instruction must also uphold the philosophy and mission of the University while instilling positive and progressive attitudes in all students.

Primary Responsibilities

- Serves as Chief Flight Instructor in the absence of the Director of Flight Instruction
- Directs daily operations to ensure compliance with federal air regulations
- Supervises flight scheduling
- Makes hiring recommendations, trains staff, and evaluates performance
- Develops training manuals and procedures for pilots and CFIs
- Monitors pilot proficiency and currency
- Ensures instructor records are accurate and up to date
- Audits flight training records regularly
- Serves as Flight Training Operations representative, as necessary
- Attends community outreach programs and engages in professional development activities
- Provides both classroom and flight instruction, as needed

Qualifications

- Hold a commercial pilot or an airline transport pilot certificate and a current flight instructor certificate
- Meet the pilot-in-command recent flight experience requirements of 14 CFR §61.57
- Pass a knowledge test on teaching methods, the Aeronautical Information Manual (AIM), applicable provisions to parts 61, 91, and 141, and the objectives and approved course completion standards of the course for which the person seeks to obtain designation
- Pass a proficiency test on the flight procedures and maneuvers appropriate to that course
- All other assistant chief instruction qualifications as listed in 14CFR § 141.36

Airlines for America

Airline Traffic Management Coordinator

The Airline Traffic Management Coordinator, working at the FAA ATC System Command Center (ATCSCC) in Warrenton, Virginia, is the primary advocate for all A4A member airlines working collaboratively to ensure implementation of appropriate solutions to operational problems while maintaining the safety and integrity of the National Airspace System (NAS).

Duties and responsibilities

- Facilitate seamless communication between A4A member carriers and FAA ATCSCC on all pertinent traffic management initiatives.
- Review tactical and strategic system efficiency constraints and collaborate with member carriers to heighten situational awareness.
- Facilitate the A4A daily conference call with A4A member carriers to develop a daily strategic plan of operation on behalf of member airlines situational awareness. ••••
- Participate in daily FAA ATCSCC Telcons, Event Reviews and National System Reviews (NSR).
- Represent A4A as required in various air traffic forums.
- Participate in A4A Council meetings and activities
- Develop and foster relationships between the aviation industry and the FAA Air Traffic Organization.
- Provide support to member airlines by exploring ways to increase safety and efficiency while reducing costs.
- Provide analyses of daily NAS operations

Qualifications

- Bachelor's degree in a related aviation/safety field or equivalent experience.
- Strong knowledge of airline operations control and air traffic management system operations required.
- FAA Flight Dispatch Certification and/or FAA ATC experience preferred.
- Three-years of experience at FAA FAR 121 carrier preferred.
- Must be able to effectively facilitate communication and advocate positions on behalf of Airlines for America member carriers in a positive, even-tempered manner.
- Must be able to work with absolute integrity and sense of fair play to represent a diverse A4A membership.
- Must be available for various shifts, which includes evenings, weekends and holidays and on-call.
- Must be available for occasional travel, including travel to A4A headquarters as directed.
- Must be US citizen to obtain required security clearance.

Work Environment and Competitive Benefits

- All A4A employees must be fully vaccinated for Covid-19.
- Choice of medical plans, plus free life, dental and vision coverage. 401(k) with matching contributions, airline travel privileges, tuition reimbursement plan, and 12 weeks of fully paid parental leave.

How to Apply

Applicants, please send cover letter, resume, salary requirements to hr@airlines.org attention JOA# 23-0001

Southern Illinois University Carbondale

Assistant Professor (Airframe and Powerplant)

The College of Health and Human Sciences at Southern Illinois University Carbondale is seeking eligible applicants for the above anticipated position beginning Fall 2023, or until suitably qualified individuals are found. This is a nine-month, continuing appointment which may lead to tenure. This position will support the baccalaureate degree in Aviation Technologies developed to prepare aviation technicians with advanced technical skills. Promising new faculty in CHHS are offered competitive startup packages, including graduate/undergraduate assistant support, course releases, and summer salary designed to jump-start research scholarship.

Required Qualifications

Earned master's degree, required by time of appointment, and minimum professional experience of three years full-time employment in aircraft maintenance, repair or installation, aircraft/engine manufacturing or product support environment. Valid FAA Mechanic Certificate with Airframe and Powerplant Ratings. One earned degree in an aviation or related discipline.

Preferred Qualifications

Earned doctorate. Successful post-secondary teaching experience in aircraft maintenance and/or product support. Professional experience/employment in helicopter maintenance. Demonstrated history of scholarly productivity in Aviation Technologies or related fields. FAA Mechanic Certificate obtained as the result of completing an FAA-approved Part 147 curriculum.

Responsibilities

Primary teaching responsibilities will include instruction in the undergraduate Aviation Technologies baccalaureate program which is also an FAA-approved Part 147 Airframe and Powerplant program. Participation in program/department support activities and service on committees at various levels is required. It is expected that the successful candidate will identify and develop an area of personal research interest resulting in scholarly productivity consistent with the applied research goals of the College and University. The individual will engage in scholarly activities and professional service related to the aviation discipline. Service which enriches the community, College and University is also expected, as is fulfillment of other assignments as may be required.

Application Deadline

April 30, 2023, or until suitable applicants are found.

To apply

Go to <https://job.siu.edu>. Create a profile and upload a letter of application specifying the position to which application is being made and including research interests, current resume or vitae, and names, addresses and telephone number of five references.
